

NOTICE TO SHAREHOLDERS

As shareholders of Nordea 1, SICAV, you are hereby informed that a new Prospectus of Nordea 1, SICAV will be issued in December 2021 including the following key changes effective as from 14 December 2021 (the “**Effective Date**”):

1. Key changes

1.1 relevant to all shareholders

Funds that apply baseline ESG safeguards, in line with Article 6 of the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (“**SFDR**”), will display the following EU taxonomy-related disclosure: “*The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable investments*”.

Funds that promote ESG characteristics as per Article 8 of the SFDR will display the following disclosure: “*The fund does not commit to investing in sustainable investment and therefore disclosures required by Article 6 of the EU Taxonomy Regulation do not apply*”.

The investment policies of funds investing into corporate and covered bonds are slightly amended to delete references to “years” when referring to modified duration.

The following risk warnings in “Risk Descriptions” have been updated for clarification purposes:

- “Credit risk” has been updated to include specific risks associated with investment in high yield securities.
- “Hedging risk – currency hedged share classes” has been updated to clarify that currency hedging may not be successful, especially during times of market volatility. Mainly due to interest rate differentials and costs associated with performing the hedging activity, the currency hedged share class may have a different performance to the equivalent share class in the base currency.
- “Legal risks” is added to describe the risk that legal agreements that Nordea 1, SICAV may enter into in respect of certain derivatives, instruments and techniques are terminated due, for instance, to bankruptcy, supervening illegality or change in tax or accounting laws.
- “Liquidity risk” further details circumstances in which liquidity risk may arise.

A fund which is assessed to be materially exposed to liquidity risk will include a liquidity risk warning under the fund-specific “Risk considerations”.

The disclosure of usage of securities financing transactions under “How the Funds Use Instruments and Techniques” is updated to clarify that, where a fund enters into repurchase transactions or total return swaps (“**TRSS**”), including contracts for difference, the expected and maximum usage is set out in the relevant “Fund Descriptions”. A fund that does not enter into repurchase transactions as of the date of the current prospectus (i.e. the expected usage of repurchase transactions being “none”) may, however, enter into repurchase transactions provided that the maximum usage of such transactions does not exceed 100% of total assets and that the relevant “Fund Descriptions” are updated at the next opportunity. A fund’s expected

usage is an indicative limit, not a regulatory limit, and the actual usage may exceed the expected usage from time to time. Updated information on the actual usage is available on request and free of charge at the registered office of the management company.

According to the European Securities and Markets Authority (ESMA) guidelines on performance fees, where performance fees are calculated based on performance against a reference benchmark index, we are obliged to disclose the name of the benchmark and show past performance against it. Accordingly, we clarify under "the Performance fee" section that past performance against the hurdle rate is disclosed, once available, in the applicable KIID.

The "Share Class Fees" section has been streamlined in order to clarify cost implications for currency hedged share classes, and to confirm that "Operational expenses" include a central administration fee, depositary fees (charges for safekeeping and other associated services) and the subscription tax (*taxe d'abonnement*). Depositary transaction fees and other transaction-related fees, such as brokerage fees and commissions, stamp duty or similar levies fall under "Expenses not included in any of the above". There is no increase in the overall costs taken from each fund.

Under "Swing pricing" the maximum adjustment factor that may be applied has been increased from 1.75% to 2.00% of what the NAV would otherwise be for all share classes within a fund, in accordance with regulatory guidance and market practice. In extraordinary situations (such as high net dealings, significant market volatility, market disruption or significant economic contraction, a terrorist attack or war (or other hostilities), a pandemic or other health crisis, or a natural disaster), this limit may be increased, on a temporary basis, to protect the interests of shareholders. Shareholders will be notified of a decision to increase the adjustment swing factor limit via a notice. The swing factor of a specific fund is available upon request and free of charge at the registered office of the management company.

Under "Notices and Publications" it is clarified that notices and statements and confirmations will be sent to all shareholders at the address on the share-holders' register, either physically, electronically, or as an e-mailed link, subject to investor consent (where required).

The "SICAV" section includes the legal successor (J.P. Morgan SE, Luxembourg Branch) to the Depositary, J.P. Morgan Bank Luxembourg S.A, following a corporate restructuring due to take effect on or around 22 January 2022.

The list of board members and conducting officers of the Management Company, and the list of sub-investment managers, have been updated.

The updated Prospectus will further reflect regulatory updates, clarifications, minor formatting and editorial changes.
